

# AHE SERVICE TUTORIALS

Thank you for choosing Accredited Home Elevator Company

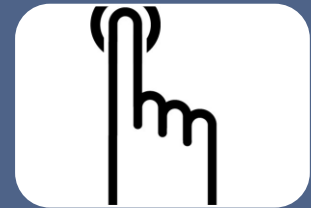

Accredited's elevator service department wants to give you a quick "5 Step" tutorial on how to use your new elevator...

Step 1: Press the call button located outside of your elevator.

Step 2: Once your elevator arrives to the desired floor, step on the elevator cab closing the door and the gate behind you.

Step 3: Press the button for your desired floor.

Step 4: Once your elevator has reached the desired floor, open the gate and the door.

Step 5: Exit your elevator cab closing the gate and door behind you. If not, the elevator will not travel to another floor.

## Other important things to remember is....

- Located to the right of your control panel is a breaker switch that is for you to use, disable the elevator, and restart it.
- DO NOT LEAN AGAINST THE GATE OR DOORS.
- You will be receiving a sheet describing the service plans that we offer, and the different levels of service we provide.
- ALWAYS MAKE SURE THE GATE AND DOOR ARE SECURELY CLOSED.
